PROJECTS

Comparison of Exchange Rate Forecasting Models

Nelson Marlborough Institute of Technology | 2023

- Conducted a comparative study analysing statistical forecasting techniques for predicting exchange rates between the New Zealand Dollar and currencies of its major trading partners (USD, AUD, CNY). Evaluated multiple forecasting models including Regression, Moving Average, Holt's method and Naive forecasting to determine predictive accuracy and implications for financial planning and risk management.
- Tools & Frameworks used: Power BI, Power Query, and MS Excel.

Space Journal Website and Digital Publishing Platform

SpaceOne Times | 2026

- Ideated, developed and launched SpaceOne Times, a responsive space journal website with a public news interface and a secure administration dashboard. Built the platform using Next.js, React, MongoDB and Mongoose, with structured workflows for creating, reviewing, publishing, scheduling, updating and removing articles. Implemented reusable post layouts, categories, author information, image attribution, search, pagination, view tracking and responsive presentation across mobile, tablet and desktop devices. Tested content workflows, resolved deployment and database issues, configured production hosting through Vercel, connected the custom domain, and supported search-engine indexing, canonical-domain configuration and ongoing website maintenance.
- Tools & Frameworks used: Next.js, Node.js, React.js, MongoDB, HTML, GitHub, Vercel, Visual Studio Code.

Cloud Based POS & Billing Application

Heartinz Technologies Pvt Ltd | 2024

- Worked on the Android application for NEGO Bill, a cloud-based POS system designed for small, medium, and large scale retail businesses. Contributed to mobile features supporting billing operations, transaction handling, sales report dashboard etc.
- Tools & Frameworks used: Android Studio, Java, Kotlin, REST API Integration.

Charge Meter - Phone Battery Monitor

Heartinz Technologies Pvt Ltd | 2024

- Ideated, developed, and deployed an Android application that has exceeded 5M+ global installs with a 4.5★ rating on Google Play. Led the full product lifecycle including concept development, feature design, user experience improvements, and ad monetisation strategy while continuously enhancing performance and functionality.
- Tools & Frameworks used: Android Studio, Java, Android Services.

PROFESSIONAL EXPERIENCE

Lagardère Travel Retail | Customer Service Representative

Nov 2025 – Present | Christchurch

- Assisted 200+ customers daily in a fast-paced airport retail environment, delivering friendly and efficient customer service.
- Resolved customer enquiries and concerns promptly, escalating complex issues when required to ensure customer satisfaction.
- Processed cash and electronic transactions accurately while maintaining attention to detail.
- Assisted international travellers with their purchases, adapting communication to customers from diverse backgrounds.
- Consistently followed company procedures for cash handling, security, and inventory management.
- Contributed to smooth store operations during peak travel periods through effective teamwork and prioritisation.

Heartinz Technologies Pvt Ltd | Android Developer

Jun 2024 – Present | Remote

- Support ongoing Android application development, implementing feature enhancements and resolving issues using Java and Kotlin.
- Contribute to ad monetisation planning by optimising ad placements and monitoring revenue performance.
- Collaborate with cross-functional team members to improve UI/UX, refining user flows based on user feedback and analytics.
- Perform application maintenance, testing, debugging, and performance optimisation to ensure stable releases.
- Support the ongoing development and maintenance of the NEGO Bill Android application for POS and billing operations.

Key Achievements:

- Played a key role in the development and continuous enhancement of the Charge Meter Android application, contributing across the product lifecycle from feature development to deployment. Helped grow the app to 5M+ Google Play installs while maintaining a 4.5★ user rating through performance improvements, UX enhancements, and ad monetisation optimisation.

OneStaff | Metal Fabricator

Sep 2025 – Sep 2025 | Rolleston

- Assisted in metal fabrication, cutting, and assembly according to technical drawings.
- Operated fabrication tools and maintained workplace safety standards.

MacLab NZ | Machine Operator

Jan 2024 – Apr 2024 | Nelson

- Maintained production records and conducted quality checks.
- Monitored and adjusted equipment settings to optimise the extraction processes.

Pizza Hut | Duty Manager

Oct 2022 – Dec 2023 | Nelson

- Supervised shift operations, allocated tasks, and ensured service quality standards.
- Managed cash reconciliation, inventory control, and daily reporting.
- Handled customer escalations and supported team performance during busy periods.

Key Achievements:

- Led a team of 8–12 staff during peak trading hours, maintaining service standards, customer satisfaction, and operational efficiency.

Heartinz Technologies Pvt Ltd | Android Developer

Oct 2020 – Apr 2022 | Coimbatore

- Designed, developed, and deployed Android applications using Java and RESTful APIs.
- Collaborated with cross-functional teams to gather requirements and implement features.
- Conducted testing, debugging, and performance optimisation to ensure stable releases..

PACKIS | Dispatch Coordinator

Aug 2019 – Sep 2020 | Trivandrum

- Coordinated daily order processing for an online supermarket, ensuring customer orders were accurately received, assigned, and dispatched on time.
- Used Microsoft Excel and PACKIS's custom order and inventory management system to track orders, update dispatch records, and maintain inventory accuracy.
- Worked closely with warehouse packing and delivery teams to prioritise orders, resolve fulfilment issues, and ensure efficient order processing.
- Monitored order status, addressed operational bottlenecks, and maintained accurate documentation to support smooth daily warehouse operations.

Key Achievements:

- Coordinated uninterrupted order fulfilment during the COVID-19 lockdown by coordinating dispatch operations under staff shortages and significantly increased order volumes, helping ensure timely delivery of essential groceries.

Fiverr and Upwork Freelancers | Freelancer

Jun 2017 – Apr 2019 | Remote

- Delivered freelance projects for international clients across web development, graphic design, multimedia, and language services.
- Designed and developed responsive static websites using HTML, CSS, and WordPress.
- Created promotional posters, banners, and digital marketing assets using Adobe Photoshop.
- Produced promotional and YouTube video advertisements using Final Cut Pro.
- Completed voice-over and translation projects while consistently meeting client expectations and project deadlines.
- Designed 3D architectural models and animated walkthroughs using SketchUp and Lumion for client presentations and promotional projects.

Key Achievements:

- Designed and developed an animated Beachside Café and Park concept for Club Mahindra Resorts using SketchUp and Lumion. The project received state-level recognition for its visual design and presentation quality.
